PARTNER** 2024/25

# **GOLD PARTNER**

## PROSPECTUS 2024/25

## Gold Partnership Programme 2024/25

The Sci-Tech Daresbury Gold Partnership Programme is an initiative that brings together a network of regional and national organizations with proven expertise and services that can benefit companies on the Sci-Tech Daresbury campus.

As a leading science and technology campus, Sci-Tech Daresbury recognizes the value of collaboration and partnership in driving innovation and growth.

Through the Gold Partnership Programme, companies on the campus can tap into a diverse range of resources, knowledge, and experience to enhance their competitive edge and accelerate their development.

The programme offers a unique opportunity for companies to access a broad range of support services that can help them thrive and grow in today's dynamic business environment.

Our Gold Partners are keen to help and we would encourage an early conversation “over a coffee” where you have business questions or challenges related to their area of expertise, whether for a first conversation or a second opinion.

# Gold Partners

- Workforce training and development

Asset Lifecycle Solutions (ALS) is an industry leader in sustainable IT equipment and laboratory equipment disposal and recycling services, helping businesses safely and responsibly dispose of their unwanted equipment, while minimising the environmental impact of electronic waste.

ALS understand the importance of data security and environmental sustainability when it comes to IT equipment disposal. That's why they offer secure collections from anywhere in UK using their own fleet of secure CCTV recorded and GPS tracked vehicles.

Their business is accredited by ADISA to DIAL (Data Impact Assurance Level) 3 with distinction which is the highest level of accreditation awarded in recognition of their secure data wiping facility, processes and service levels.

All equipment is delivered to their state-of-the-art facility based in Cheshire, where they utilise the latest technologies and best practices to ensure that your data is securely erased and your equipment is sustainably recycled.

With Asset Lifecycle Solutions Limited as your partner, you can rest assured that your IT equipment will be disposed of and recycled in a safe, secure, and sustainable manner, while also freeing up valuable space and resources for your business.

Powerful and effective marketing enables you to grow your business. The right marketing partner is a crucial ingredient to help you to realise your growth ambitions – a company that is experienced, proven and delivers a strong return on investment.

David Antrobus Marketing has a clearly defined purpose – it's to help their clients to grow their business, through their multi-skilled in-house team.

They have successfully been growing businesses for over 25 years, and their continued proven experience has equipped them to deliver outstanding results for their clients.

Preserving their core values of Integrity and Passion throughout their journey of success is something they are very proud of, along with their unique commitment to their highly valued team – operating the business on the principle of 'function over position' – rewarding everyone appropriately and making the company an enjoyable place to work.

They are the UK member firm in the global Grant Thornton network that employs more than 62,000 people in over 140 countries. Locally they have large offices in Liverpool and Manchester with over 600 staff.

They focus on delivering a local service, but with global reach, providing support in the areas of:

- Accounting Services including bookkeeping;
- Audit and grant assurance;
- Taxation services including Company/Personal tax, along with specialist areas such as R&D and VAT, and
- Advisory services including Corporate Finance, Transaction Support and Dispute resolution.

The combination of their local presence, with national and international reach means they can support you whether you are an early-stage business operating in one market, or an established player with global scale.

They invest in listening, understanding your concerns, so you consistently get a great service you can trust.

At IBM Research they live by the scientific method. It's at the core of everything they do. They choose impact over market cycles, vision over vanity. They deeply believe that creative freedom, excellence, and integrity are essential to any breakthrough.

They're discovering new materials that will be used in the next generation of computer chips; they're building bias-free AI that can take the burden out of business decisions; they're designing a hybrid-cloud platform that operates as the world's computer. They're moving quantum computing from theory to systems that are redefining the world.

They operate with a backbone. They don't cut corners. They take responsibility for technology and its role in society. They make decisions with a conscience — for a future that we believe is worth living in.

We recognize the immense power and potential of computing — not as a commodity, but as an agent of progress and connection.

This is the future, built right.

We're disrupting the insurance landscape by giving our brokers the freedom, resources, and technology to truly protect their clients and help businesses like yours get the protection they need to grow. We've spent years building the tech stack to power the broker of the future and create the most comprehensive version possible. Combining innovative technology with a collaborative approach, we strive to transform the commercial insurance broking model.

Our expert brokers are given full freedom to utilise the latest tools, ensuring that you receive the very best advice and guidance possible for your business. Our team are also continually updating the broking platform using tech and organisational insight in order to optimise both client and broker experience.

Your business is unique. So are we.

Konsileo find insurance and risk management solutions that don't fit in a box – but do fit you.

Founded in 1881 as the original 'red brick', the University of Liverpool is one of the UK's leading research-intensive higher education institutions with an annual research income of £141 million.

Consistently ranked in the top 200 universities worldwide, we are a member of the prestigious Russell Group of the UK's leading research universities and have a global reach and influence that reflects our academic heritage as one of the country's largest civic institutions.

We are at the global forefront of translational R&D with distinctive world-leading capabilities in infection, materials chemistry, high-performance computing and AI solutions. We have a growing network of researchers assembled around topics such as digital health, quantum computing and cyber security, with cross-cutting capabilities and work with industry to co-create solutions to some of the world's most complex problems.

We are driving the Liverpool City Region's knowledge economy through close collaboration with fellow universities, industry and the NHS. The city's research base alone is engaged in delivering £470 million of research activity per year alongside worldwide partners.

Organisations of all sizes and sectors can benefit from the University's world-class expertise through a range of mechanisms including: collaborative research, consultancy, licensing technology and spin-outs, knowledge transfer partnerships, workforce development and access to world-class equipment & facilities.

Our Careers Employability Team delivers creative solutions for employers to connect with and recruit our student and graduate talent, from authentic experiences built into the curriculum to in-person events and digital solutions. Businesses can also access professional development courses through The University of Liverpool Management School, in areas such as leadership, innovation and sustainability.

Our key innovation assets include; The Digital Innovation Facility, Virtual Engineering Centre and the Materials Innovation Factory.
